Process:

We implement 3 stage of tank cleaning process:

- **Stage I – De-Watering:**

Water is pumped out of the tanks using an electrical pump.

- **Stage II – Access lid cleaning:**

The access lid and its immediate surroundings are cleaned off mud, algae, dirt etc. using a high pressure washer with potassium permanganate.

- **Stage III - Sludge Removal:**

Sludge, mud and dirty water are removed using a sludge pump and a wet vacuum cleaner.
